Flag[®]

MADE IN USA

ON LAND & SEA - THE ULTIMATE FLAG

WELCOME TO FAST-FLAG

The ultimate flag for whatever moves you on land and at sea. Fast-Flag is a solid, rigid flag made of aluminum. Our patented design is truly a functioning work of art and a unique way to make a statement.

An entirely new concept with its distinctive sleek aerodynamic design and raked back aft leaning stance, these flags look like they are moving fast in the wind when standing still: thus, the name, Fast-Flag.

No more fabric ripping to shreds. No more limp and droopy flags folding and furling on itself and getting tangled up. Our flags are made of precision cut aluminum components welded to perfection and powder coated to last you a life time. Our flags stand tall and proud 24/7, in any weather condition - becoming an integral part of any boat, yacht or offshore fishing machine.

If you're a boat owner, you know all the issues that comes with the standard fabric flag. Our flags are designed to be installed as a permanent fixture on your vessel prominently displaying her Stars and Stripes.

Fast  **Flag**[®]
WWW.YOURLASTFLAG.COM MADE IN USA

Flag Options, Sizes and Features:

Selecting the right flag for you and your boat.

There are several things to consider when contemplating a Fast-Flag. Size, type and style as well as various features and options. Though there are no absolute rules to follow, when it comes to outfitting your boat with a Fast-Flag, it truly is all about you and your aesthetics. Fortunately, we offer 5 sizes to choose from and 2 distinct types: Stencil or Solid as well as many colors and finish options to help make the selection process easy.

Regarding LED light strips from SplashLights:

Because all Fast-Flags are designed to be permanently mounted on your boat, much like a radar or GPS or any other piece of electronic equipment, you may consider adding LED light strips from SplashLights.com to illuminate your flag. Manufactured specifically for Fast-Flag, SplashLight strips are IP68 and comes with a lifetime warranty and are designed to be installed directly into a slot built into the base of each flag. Available in cool white or RGB (red, green & blue) for the full range of colors. With SplashLight strips, you can highlight your flag to suit any occasion.

Don't be afraid of the dark. From top to bottom, SplashLights has you covered. They offer a full assortment of marine lighting fixtures to fully enhance your boat's appearance at night. Visit splashlights.com for their entire selection.

Please don't allow this to happen to your flag.

The right flag for the right reason.

If you are interested in flying a flag, please consider all the factors.

Sadly, the standard fabric flag just will not last when subjected to high winds and extreme conditions. Especially in the harsh salty marine environment. This is why Fast-Flag was born - to meet the demanding needs of high-performance offshore fishing vessels. If Fast-Flag can survive there, it can survive anywhere, on any vehicle on land and at sea.

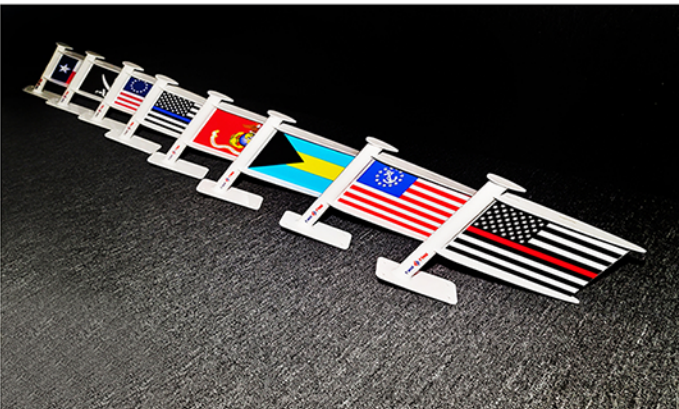

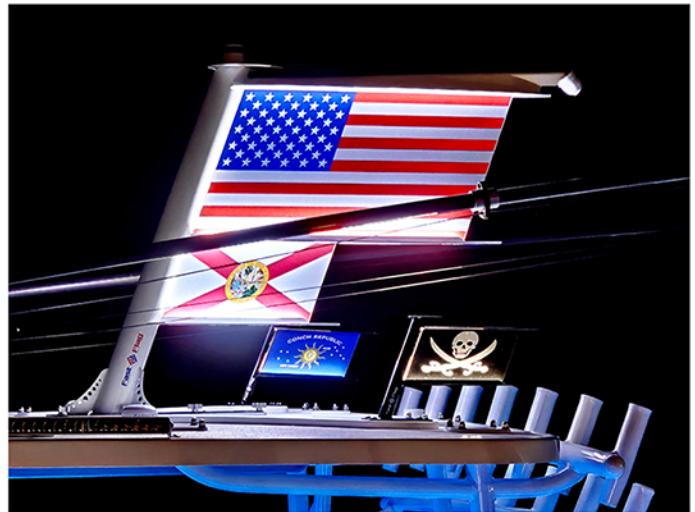

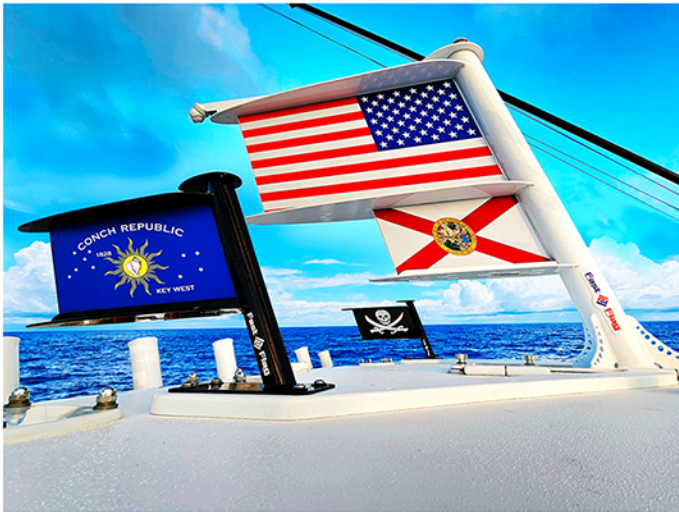

This is why we say, Fast-Flag is your last flag - the ultimate flag for whatever moves you.

The ultimate accessory flags: SS-10 & SS-6

The ultimate in accessory flags. Available in 10" and 6" sizes. The compact size and simple design of these flags make them the ideal flag for anything that moves you such as a golf cart, tender or even a forklift. With 4 small screw holes for attachment and super strong 3M double sided adhesive tape, you can mount your flag on any surface you desire.

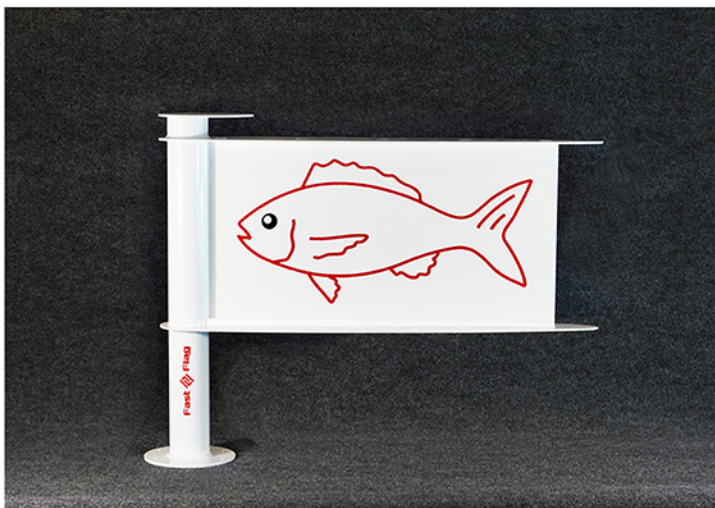

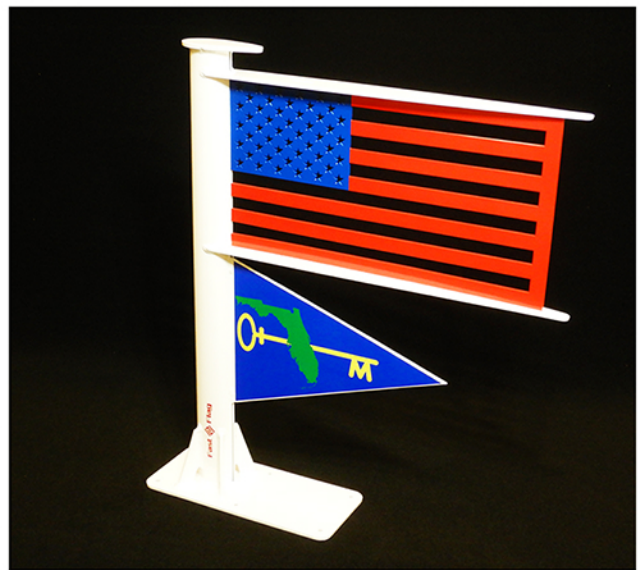

As with all Fast-Flags, the SS-10 and SS-6 flags are made of solid aluminum and come in 2 styles, the contemporary stencil design as well as the traditional red, white and blue Stars and Stripes. Day or night, these flags become the main design feature which says it all about you, your boat, your golf cart or anything else you ride or drive.

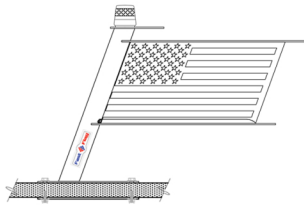

Customization and Speciality flags

Necessity is the mother of invention and at Fast-Flag, this is at the core of what we do and who we are. The majority of our designs and products have been in response to you and your needs.

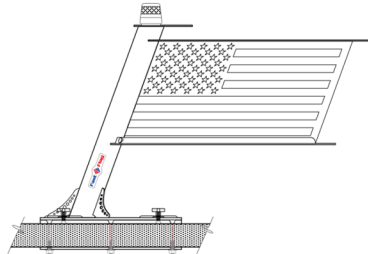

If you have an idea for a custom flag, a special feature or a unique problem that needs a solution, please reach out to us and let us know. Our design team and graphics experts may be able to help you and find the right solution for your needs.

SS-6 SOLID R/W/B

SS-6 STENCIL

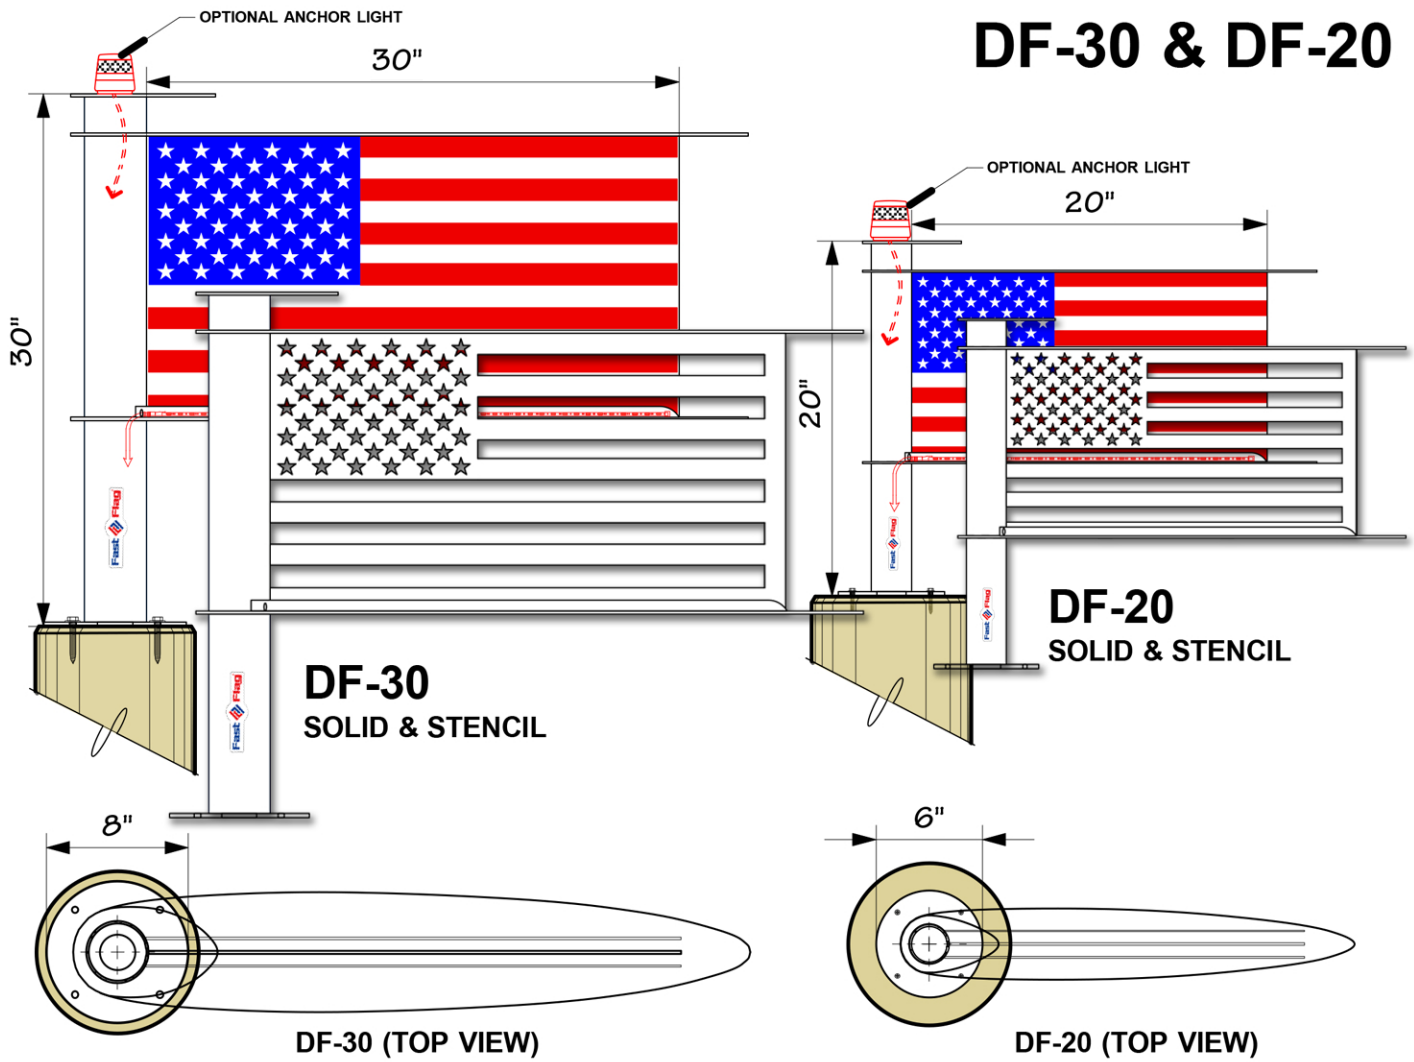

MB-10

MB-10 SOLID

With its 90-degree vertical mast, the MB-10 is a compact flag similar to the DF-20 and DF-30. What sets this flag apart from the others is its small square mounting plate - perfect for attaching on top of any 4x4 post or, with the optional adapter base plate: CB-1, this flag can be mounted to any typical roadside mailbox. Like all Fast-Flags, the MB-10 is produced to the same standards you would expect - all aluminum construction and powder coated to last.

DF-30 & DF-20

DF-20 & DF-30 SOLID & STENCIL

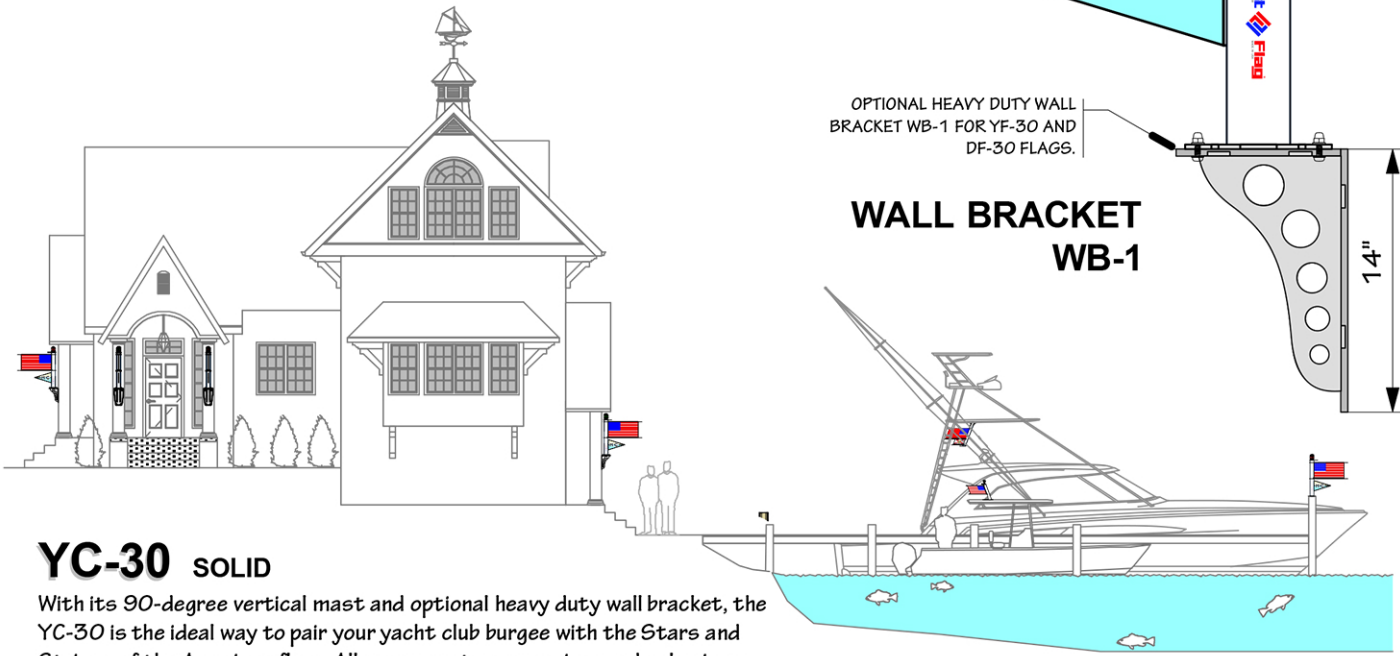

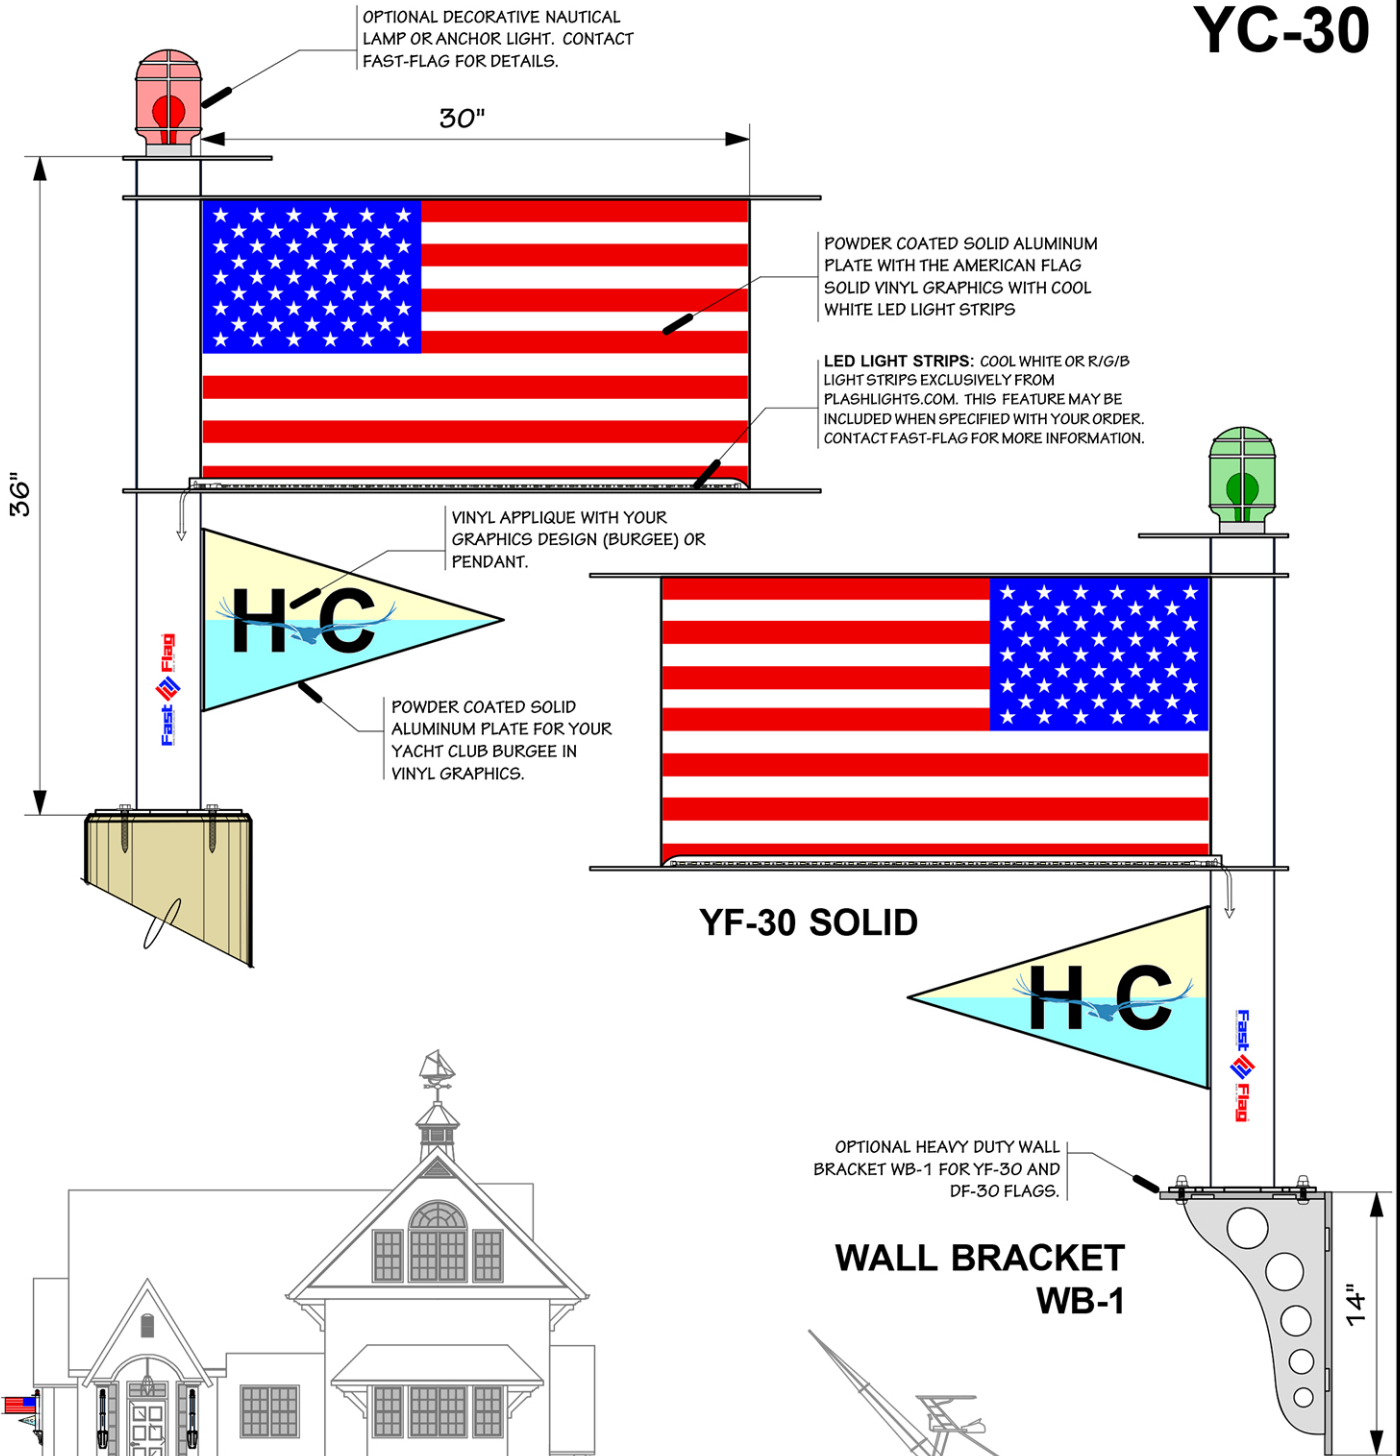

Built to the exact same standards that you'd expect from Fast-Flag: Solid, strong, yet lightweight all aluminum construction with laser cut components that are welded to perfection and powder coated to withstand the harsh marine climate. The DF-20 and DF-30 flags have a straight 90-degree mast - designed to be mounted on any solid stationary surface such as a dock, deck or piling.

Available in two sizes and may be illuminated with Plashlights IP-68 rated LED light strips. These flags will complement any dock, marina or outdoor entertainment area.

The Ultimate Dock Flag

YC-30

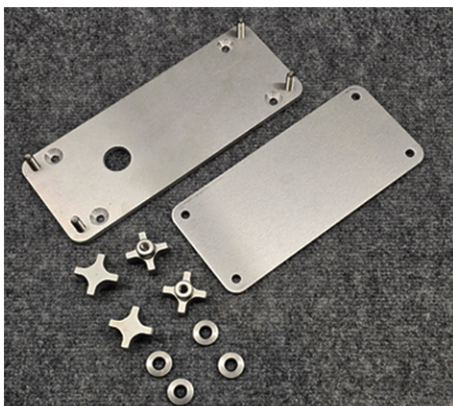

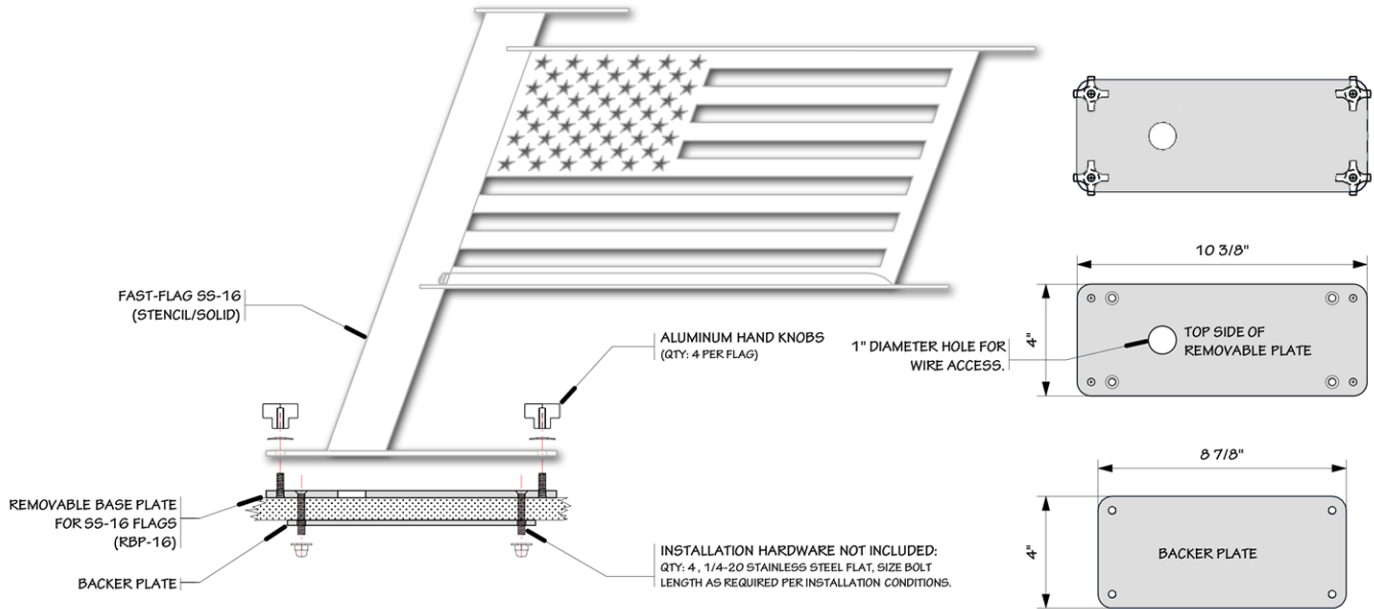

YC-30 SOLID

With its 90-degree vertical mast and optional heavy duty wall bracket, the YC-30 is the ideal way to pair your yacht club burgee with the Stars and Stripes of the American flag. All components are marine grade aluminum, laser cut with precision, welded to perfection and powder coated throughout to last a lifetime. Our graphics debatement can take your burgee design and convert it into a vinyl wrap design to last years and years. The YC-30 truly is the ultimate flag for your club, marina or dock.

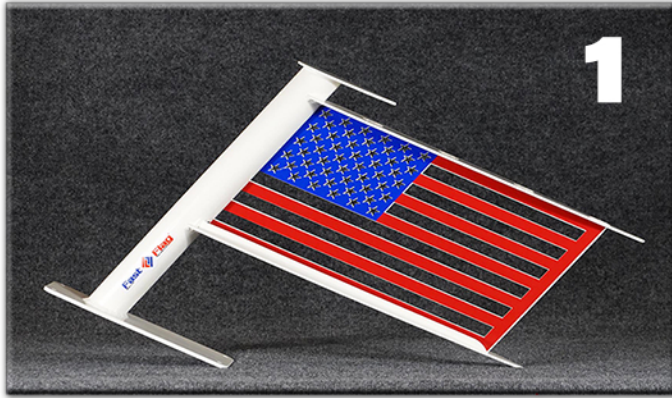

RB-16

RB-16

The RB-16 is an optional base plate that is designed to go between your boat's hardtop/deck and any SS-16 Fast-Flag. When installed, this optional feature will enable the easy removal of the flag by way of 4 solid aluminum hand knobs. An access hole is provided, aligning with the flags mast to serve as a wire chase for LED light strip wires and or for anchor lamp wires.

There are many factors and choices to process when considering a Fast-Flag. Given all the variables, options and features, the process may be overwhelming. Our design team and graphics experts are here to help you sort out all the issues and find the right fit and combination for you.

Our mission is simple - to produce a solid American flag proudly made in America. A flag that's like none other.
A flag you'd be proud to display - without exception.

Fast-Flag, the Ultimate Flag for Whatever Moves You.
